

KRISHNA SATHVIKA GANNI

+1-XXX-XXX-XXXX | Email | LinkedIn | GitHub

SUMMARY

Computer Science graduate student with a strong foundation in **data science**, **machine learning**, and **analytics**, proficient in **Python**, **SQL**, and **data visualization**. Experienced in **predictive modeling**, **statistical analysis**, and **ETL workflows**, with the ability to translate large, complex datasets into actionable insights.

EDUCATION

M.S. in Computer Science

New Jersey Institute of Technology

Newark, New Jersey, USA

GPA: 4.0/4.0 (Current)

2024 – Present

B.Tech in Computer Science and Engineering (Cybersecurity)

Ramachandra College of Engineering

Eluru, Andhra Pradesh, India

CGPA: 8.25/10.0

2020 – 2024

SKILLS

Programming & Databases: Python, SQL, Data Structures & Algorithms, MySQL, PostgreSQL
Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Microsoft Excel
Machine Learning & AI: Scikit-learn, Linear Regression, Decision Trees, Random Forests, Gradient Boosting, EDA, Feature Engineering, Statistical Analysis, A/B Testing
Tools & Methodologies: Git, GitHub, Streamlit, Flask, Agile, Jira
Operating Systems: Windows, Linux, Mac
Soft Skills: Problem Solving, Communication, Collaboration, Analytical Thinking

EXPERIENCE

- **Data Science & Machine Learning Intern** YBI Foundation, India | Nov 2022 – Dec 2022
 - Developed a **Heart Disease Prediction model** that achieved **95% accuracy** using **Logistic Regression** and **Random Forest**.
 - Applied core data science techniques, including data preprocessing and visualization, using **Python**, **Pandas**, **Scikit-learn**, and **Matplotlib**.

PROJECTS

- **Customer Churn Prediction** Jun 2025 – Jul 2025
Tech Stack: Python, Scikit-learn, CatBoost, Streamlit, Docker, SHAP, GitHub Actions, Render
 - Built an **end-to-end machine learning solution** to predict customer churn using the Telco dataset.
 - Trained and evaluated multiple models, including **Random Forest**, **XGBoost**, and **CatBoost**, achieving a **ROC-AUC of 0.93**.
 - Developed and containerized an interactive **Streamlit** application with **Docker**, deploying the solution on **Render**.
 - Integrated **SHAP** for model explainability and automated the CI/CD pipeline using **GitHub Actions**.
- **Student Face Recognition System | Group Project** Jan 2024 – Apr 2024
Tech Stack: Python, Flask, MySQL, Machine Learning
 - Collaborated to develop a real-time facial recognition system using **machine learning algorithms** to verify student identity during exams.
 - Utilized **Python**, **Flask**, and **MySQL** to build the application and integrate it with a backend database for authentication.
 - Enhanced academic assessment integrity and reduced impersonation risks through secure, automated student verification.

CERTIFICATIONS & HONORS

- **NJIT Provost's Scholarship**, New Jersey Institute of Technology 2025 – Present
- **Python for Data Science**, YBI Foundation 2022
- **Security Fundamentals**, Microsoft MTA Aug 2022
